ELECTRIC

# ALL NEW ES-34SL

## Flawless Presentation & Results

The ES-34SL is a dedicated, battery-powered finishing mower utilising our latest lithium-ion battery technology. Designed with a lightweight chassis and a smaller diameter cylinder, it creates the perfect finish for stadia and large turf areas alike.

DISCOVER

Discover the full specifications and see the ES-34SL in action at [www.dennisuk.com](http://www.dennisuk.com)

Weighing around 50 kg lighter than the ES-860, the ES-34SL is optimised for everyday use. This significant reduction in weight minimises soil compaction without sacrificing performance. The precise combination of this reduced weight and the rear roller diameter produces flawless Dennis stripes.

## Experience Perfectly Precise Cutting Quality

### Weatherproof LCD Keypad Interface

A fully programmable screen controls speed selection, forward/reverse, and clip rate. It provides real-time feedback on ground speed, battery charge level, and machine settings.

### Click Height Adjustment

Machined aluminium side plates feature a simple, robust click system for height of cut and the grooming brush. Adjustments are made in exact 0.1 mm increments between 9 mm and 35 mm.

### NEW Intermediate Grooming Brush

A new intermediate grooming brush consistently presents the grass for incredibly precise cutting.

### Weile Roller

The click-adjustable Weile roller reduces grass contact by 70%, expertly lifting and positioning the grass ahead of the 8-blade cutting cylinder.

### Low Noise & Carbon Emissions

Ultra-low noise and vibration allow operators to work near protected areas without causing disturbance.

## SPECIFICATIONS

ES-34SL  
XXXX

POWER // 48 V Lithium Ion Battery

CUTTING HEIGHT // 9mm - 35mm

CUTTING WIDTH // 34" (860mm)

WEIGHT // 187 kg (excl. grassbox)

GRASSBOX VOLUME // 200 L

- ✓ Features a **rapid two-hour recharge time**
- ✓ **Costs only £1.58 for a full recharge** (excludes daily standing charge)
